

Revolutionizing Mobility in Emergency Response & Field Command

The Mobile Command Center (MC2™) delivers rapid field command for disaster response, search & rescue, public safety, and military ops. With real-time data & 24/7 connectivity, teams can respond directly where they are needed most—when every second counts.

Mobile Command Center – MC2™

Capabilities & Specifications

Field Command Support:

- On-site command and control for public safety, emergency management, military, and disaster response teams
- Dual-role platform for both manned operations and unmanned (drone/UAS) integration

UAS Mission Coordination Hub:

- Supports drone-based missions including search & rescue, first responder, delivery, reconnaissance, and survey
- Pilot and Observer stations configured for rapid response operations

Real-Time Communications & Data Sharing:

- Integrated Starlink satellite internet for high-bandwidth, real-time connectivity
- Dual-radio system for coordination
 - Emergency services communication
 - Regional ATC communication or acting as temporary air traffic coordinator in emergencies

Enhanced Situational Awareness:

- Telescoping mast with configurable sensors and cameras for live video, thermal imaging, and data capture
- Live mission monitoring, mapping, and operational control from temperature controlled and ergonomic stations

Multi-Agency & Interoperable Use:

- Deployable by city, state, or federal agencies for disaster response, law enforcement, Military or public safety
- Flexible platform adaptable to various mission profiles and geographic environments

MC2 Truck Features:

- Mobile Command Center, 2nd Row
- Generator, truck mounted
- Power flight operations, and AC
- Starlink satellite and dual-radio system
- Telescoping mast for radar, cameras, antennas or other sensor packages

The Future of Mobility is Here.
